Point Lookout Campaign Guide

You can find more of my stuff here.

“Looking for fame and fortune? Hoping to cultivate the delicious Punga fruit? Or just looking to run away from your life on these dreary shores?” - Tobar the Ferryman

Point Lookout is a swampland that was once Maryland's Point Lookout State Park before the Great War and is featured in the self-titled DLC for Fallout 3. This guide is intended to be used in conjunction with the multiple sub systems implemented in Modiphius’ Fallout 2d20 system and books. While having these books available to you is recommended you should at least have the Core Rulebook.

This adventure is predominantly intended to rehash the plot of the DLC while covering its events to the 2d20 system. Its primary focus is on exploration and the introduction of systems so that they can serve as a guide for other campaigns, games or the continuation of this game.

Character Creation

While covered in detail in the Core Rulebook I have made this tool to better streamline the process of character creation. Please consult your Overseer in regards to what sort of origins should be available to choose as some may not fit the East Coast setting or their preferences.

Keep in mind that the region of Point Lookout is a dangerous, irradiated, predominantly swampy and coastal environment and that you may not benefit from certain aspects of origins due to the remoteness of the area.

While you are able to start at higher levels, this document is intended for players to start at level one.

For new players I recommend having the following resources available to them:

- Fallout 2d20 Core Rulebook by Modiphius
- Reference Sheet - Manifest or Advanced Cheat Sheet - Ziggy8z
- Reworked Character Sheets - Ziggy8z, Magazine Character Sheet - Ziggy8z or Online Character Sheet - Ziggy8z

Leveling

As detailed in the Core Rule Book when leveling you gain +1 HP, +1 skill point and most importantly 1 new perk to select. I have made this tool to help determine what perks are available to players and would like to inform/remind anyone reading this that magazines/book items, once read can have their effects taken as permanent perks.

Gaining experience is a process to be determined by the Overseer, it is often handled in 2 separate ways. The first is simply providing experience points for the completion of quests and the overcoming of encounters, often for killing enemies and is tracked by you, the player. The second is the milestone system, where the Overseer provides larger amounts of experience points for the completion of tasks and goals exclusively, usually in levels or fractions of levels.

Exploration

Provided with this document is an interactive map of Point Lookout. Much of the adventure will reference this map using X & Y coordinates, simply meaning that a letter (X) and number (Y) will be given and they should describe the intersecting square on the map. For example **G11** is the recommended starting location for a group and the tool states the following:

- “This area is a shallow, open ocean. Moored at the rotting docks sits a pre-war river boat, its stacks still belching smoke.”
- “Ruins, Open (+1/2 speed) if keeping to the road, Rough (3/4 speed) if moving through the ruins.”

While your GM may provide more details on the location like weather, contents and its Inhabitants the main purpose of this is to inform you of the type of area and most important the kind of Terrain it is composed of.

Travel

Travel is going to be a large portion of this module along with Rest, Hunger, Thirst and Fatigue. This tool can be used to help you calculate your speed, keep in mind that each square on the map is 1 mile wide and that each hour progresses your Rest, Hunger and Thirst. Failing to maintain these or pushing yourself may result in Fatigue, the effects of which are outlined on recommended character sheets and in the Core Rulebook on page 190. If that doesn't sound fun to you, keep in mind that Robots suffer none of these effects at the cost of losing out on several other benefits.

Disease

Traveling through some environments and fighting some enemies may expose you to certain diseases. The system is further detailed in the Core rule book on page 193 and predominantly handled by the Overseer, but you are expected to track the number of times you are exposed up to a maximum of 5 and roll for a random disease if the test is failed after resting for the day. Again, if that doesn't sound fun to you, keep in mind that Robots suffer none of these effects at the cost of losing out on several other benefits.

Things that cause disease exposures:

- Animal attacks
- Eating raw meat
- Sleeping on the ground
- Spending time in hazardous environments (like swamps)

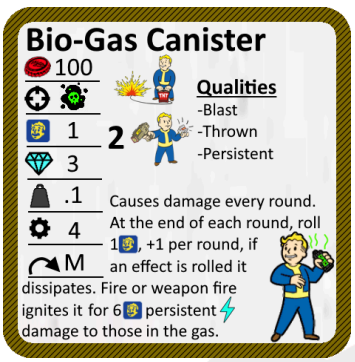

Weather

Now that meteorologists are a thing of the past, not that they were ever entirely correct mind you, you'll find yourself surprised and sometimes upset with the ever changing world. Here are some tips to help you survive the whims of the wilds.

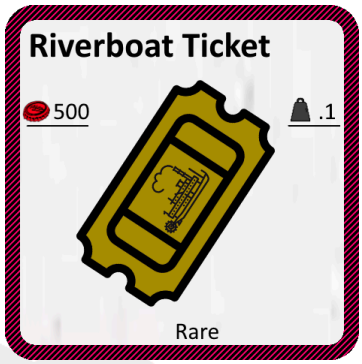

Poor Lighting/ Darkness: PER tests that rely on vision and all ranged attacks increase in difficulty by +1, +2, or +3, depending on the light level. Suggestion: Make a torch or have a light source handy.
Mist and Fog: PER tests that rely on vision and all ranged attacks increase in difficulty by +1 when the target is at Medium range or further. Suggestion: Do chems about it or wait it out, best done in a camp.
Radstorm: Any creature not in shelter suffers 2 ▫ radiation damage at the start of each turn. Suggestion: Spend time in a shelter, make a camp or tough it out with chems.
Rain: Ranged attacks with Energy weapons, and Survival tests, increase in difficulty by +1 or +2, depending how heavy the rain is. Suggestion: Do chems about it or wait it out, best done in a camp.

New Items

Some items present in the actual game are not as of yet officially published. I have created the following items and incorporated them into the Overseer's section.

Survival Tips

- Scavenging is an important part of surviving the wasteland. You can use AP and Luck to help find certain things and to hedge your bets.
- Hunting, while not officially supported by the game mechanically, may be allowed if the Overseer wants to do so. Consider using this tool to do so.
- Fishing too can be a neat distraction or occasionally a life saving activity, you can use this homebrew rule set if you find the need for it.
- Foraging as detailed on page 202 of the Core rule book allows you to search for ingredients and food with a PER+Survival test. In addition to this and due to the abundance of the Punga fruit in Point Lookout, you can spend 1 Luck point to replace your find with an equivalent amount of Punga fruit.
- This camping tool is a sort of decision mini game that you pick and choose options from.

Overseer Resources

The following section outlines running this module and provides multiple resources **for an Overseer to use**. Keep in mind that this is simply a guide and not a set of restrictions after the resources provided by session 0 section. Also, have some fallout music going or ambient sounds in the background, the radio especially if a player has a Pip-boy or radio.

Session 0

The players find themselves slowly chugging along the coastline of Point Lookout. They are aboard the old river boat, Duchess Gambit after having boarded at one of its many previous stops and having paid the ship's captain Tobar for the pleasure. They will soon arrive at Point Lookout, but in the meantime they are being entertained by slide shows. The following will help the players determine what kind of character they want to make.

Origins Slideshow

Tobar will brag about a newly acquired projector and start a slideshow for the players. This will aid players in narrowing down options without forcing them to search through every resource. I would recommend suggesting to players who feel overwhelmed by the system to try playing a robot as they are ironically less mechanically intricate. This Origins Quiz may also help individuals still unsure of an origin or overwhelmed by the variety.

G.O.A.T. Test

Once the players are done with that slide show Tobar will put on another, he seems very proud of this new addition to his ship and is hopeful that the new slides will prove more entertaining as it seems to be one on a pre-war animal.

- Provide the players with a copy of the **Test paper** or have them record their answers.
- Show them the test.
- Have the players return their answers to you.
- Fill out the **Administrator Key** paper for each player with their answers while they create their characters and fill out their character sheets.
- Return their test papers and suggest that they use the tag skills provided, alternatively they can ignore the results.

Once The players have created their characters, have them introduce themselves and ask them why they are headed to Point Lookout. These answers can range from anything as specific as searching for someone/something or just feeling the need to start over. You can incentivize them to further develop this idea by having them each create a personal side quest for their goal, it will be worth ⅓ of a level. (Ensure it is approved by you, as the Overseer.)

Tobar then docks his river boat, inviting the players to depart and explaining that return tickets are 500 caps each. The players are deposited on the Riverboat landing (**G11**). He might also mention that there is surely:

- Wealth without measure, enough to pay passage 100 time over in the old manner
- Strange tribals amidst an inland church
- The friendliest of locals all about

- All the oh so sweet Punga Fruit you can pick in the swamps
- And the most mystical of merchants just around the corner in the House of Wares. (**H10**)

Once the players realize they are unable to pay for an additional ticket back, Tobar may point out the two turrets (Machine Gun Turret Mk I) he has on the riverboat's roof and may offer to trade them for general goods until they can purchase another ticket. I made this tool for trading.

The players should be informed that they now have two active quests:

- **The Local Flavor**
  - Investigate the manor on the hill. (**L12**)
- **Mystic Merchant**
  - Investigate the merchant located in (**H10**)

From this point on you as an Overseer should use this travel tool to help dictate how many tiles the players can travel and with their speed or have them do so. The bulk of the challenge that this module provides is derived from the game's survival system so insure that the players are tracking their: Hunger, Thirst, Sleep, Disease and from those their Fatigue.

Determine too if you are going to use the officially supported tools for zone based combat as featured in the Core rule book on page 36 or the homebrew grid rules that can be found here. Players used to theater of the mind will likely prefer the zones while those more accustomed to grids may prefer the homebrew.

Finally decide if you are going to use the experience system provided in the book that relies on players tracking xp for all combats and quests or the alternative system of "milestone" xp. While both are listed on page 49 of the Core rule book, the Milestone system incentivises more nuanced play while the xp system makes players see most things as walking bags of xp. Milestone tends to be slower for leveling, while the experience system tends to be far more rapid.

Beyond Session 0

Beyond Session 0 you as a GM will and should have little sway over the players chosen path. Your main concerns every session should be having 2-3 combat encounters prepared and a good idea of where the quests are taking them next. Keep in mind that the players may not progress the quest or encounter all of these combats and that you can likely save, add to or level them up. You can also use these tools to make your life easier: Ensuring the players understand that they need to spend time looting areas and exploring while offering help and information.

- Combat Calculator
- Enemy Look Up
- NPC/Creature Leveler
- Pre-made Combat Encounters

Using the Point Lookout map's "Location Lookup" tab makes determining what kind of enemies should be present easier. You can also use my Pre-made Combat Encounters tool to create encounters more easily.

- **Swamps**: Swamp Folk, Smugglers (Human), insects and Ghouls.
- **Coastal**: Aquatic creatures and Smugglers (Human)
- **Ocean**: Aquatic creatures and Smugglers (Human)
- **Planes**: Creatures, Swamp Folk and Smugglers (Human)
- **Ruins**: Creatures, Robots and Smugglers (Human)

Random Traveling Encounters

Whenever the players enter a new tile on the map, have one of them roll 2d20. Remind them that they can use resources like Luck to alter these rolls. Refer to the below table, inform them of what they find and that the higher the number the better. Traveling on a road or in a vehicle allows them to have 1 free re-roll.

2d20	Encounter
2-3	A very hard combat encounter
4-7	A hard combat encounter
9-15	An average combat encounter
16-33	Nothing
34-38	An amenable trader is heading the opposite direction
39-40	A corpse with a rare weapon or item on it

Weather

The player section of this guide has some directions and explanations for the players regarding the effects of weather and what they might do to work around it. You as the Overseer have unlimited power to dictate what kinds of weather to have in a combat encounter and during travel. These limitations and additions should be used to great effect as they will seriously impact the players abilities and survivability.

Major weather events should be telegraphed well in advance unless they have spent excessive time isolated from the outside world, like in a cave or mine for several hours. The players should know if a snowstorm is coming, taste a rad storm on the wind or notice strange clouds as a hurricane is on approach. For less freak occurrences, however like rain or fog they tend to happen at random. You as an overseer should weaponise these environmental factors to enhance combat and travel if it starts getting boring or easy.

Doing so may just be something that wastes the players resources as they wait/camp or tough it out by traveling though it. Below are two tables that you can roll on, every hour they travel to see what kinds of weather manifests and if any, how rapidly it may approach. For the kind of weather, refer to the map tool's "location lookup" tab to pick a type of weather relevant to the area. Alternatively you could assume that swamps are going to always be foggy, or pick and choose at your whim if the players seem to be having too much ease in combat or traveling. A full list of weather can be found here under the "Environment" tab.

1d20	Weather Duration	1d20	Weather Speed, if applicable
1-2	4 hours	1-2	It has already started
3-5	3 hours	3-5	1 hour away
6-9	2 hours	6-9	1 hours away
10-14	1 hour	10-14	2 hours away
15-20	No weather	15-20	2 hours away

Once you know what kind of weather there should be, ask the players for a test or just tell them what they can expect. Clearly if under a canopy or swallowed by fog they won't be able to notice, but if they are out in the open they should be given the chance to see. Once rolled you don't need to do so until after the storm passes. Alternatively, you can just say that it is raining for an entire day or use the weather as you please for the sake of ease. Also, consider having a looping weather track or the like to help players remember that it's raining for example as it usually helps.

The Starting Quest Line

This section will outline the first two starting quests for the setting and should be read prior to the session. One adapted directly from the game "The Local Flavor" as a main quest and another I have created called "The Mystic Merchant" as a side quest. The original quests are listed here and can be used and replicated closely or used as inspiration to tell your own stories. Perhaps this game occurs pre-war, after the events of the game's or instead of it.

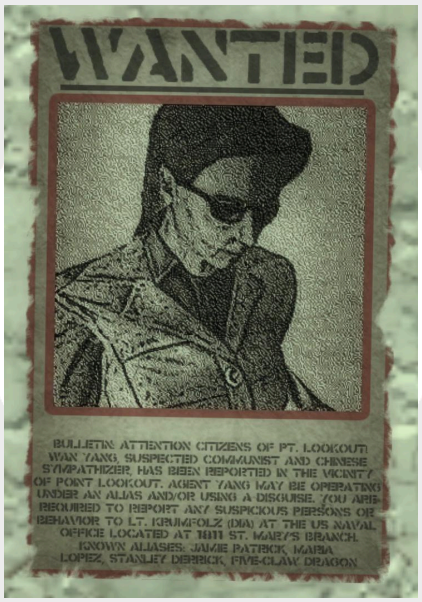

- **The Mystic Merchant,** Side Quest, Start
  - As Tobar said, just inland (**H10**) it seems that a makeshift trading emporium has been established behind the pre-war gaming booths. Though its owner seems to be distracted by a protectron trying to "arrest" her.
  - It appears that the merchant "Madam Panada" had gone into the bank and stolen fresh toiletries in the form of Pre-War money, something that the security protectron is upset over.
  - What is more unfortunate is that her money and keys were lost in the old bank as she fled and she can't trade until they are recovered.
    - *She actually still has them, but would like the players to take care of the robots inside the bank for her.*
  - If the players enter the bank there is an average Ruins encounter. For this Robots have been set up, so we will use those, but it's up to you as an Overseer.
    - Depending on the player's levels use this tool and this tool to help you make one or consider using pre-made encounters in conjunction with the other two by using this tool.
    - The People's Bank of Point Lookout has no map, so I went into the game and took a screenshot. You could just as easily assume that there would be a lobby (green), teller counter (yellow), and vault (red).
    - Try to describe the faint light, seeping through the windows, the flickering bulbs above and the musty stench of the molding building. Specify the as of this moment peaceful robots present in their line of sight, likely a security guard near the door and another acting as the teller with some maybe hiding in back or at adjacent stations.
    - Place the player's goal beyond their reach (Madam Panada's bag) visibly being carried into the back room, or resting on a table within and let them find a solution, your job is to just present **fair** problems and react.

- Once the players have defeated the enemies inside they can loot the location. This tool is handy for generating loot and we will consider this bank as a “Small Commercial” location that is “Untouched”. Since it was under guard, rendering it untouched and setting the test to loot to 0. The players can roll anyways to generate AP while risking complications. This information is on page 196 of the Core rule book.
- A “Small Commercial” location generally have:
  - 2 Food items
  - 2 Beverages items
  - 4 Junk items
  - 4 Other items
    - “Other items” just means you pick from the other categories.
- It is a bank though so we will instead have all the “junk” be Pre-War money worth 4d20 caps and use the tool to generate the items along with 2 chems and 2 oddities for our “Other” items because it feels right to me.
  - In the Locked Cash Registers:
    - Pre-War money worth 4d20 caps
  - In the bank waiting room:
    - (23) ×1 Potted Meat, CRB 151
    - (18) ×1 Cram, CRB 149
    - (16) ×1 Beer, CRB 160
    - (37) ×1 Vodka, CRB 161
    - (19) ×1 Healing Salve, CRB 16
    - (32) ×1 Grape Mentats, CRB 165
    - (12) ×1 Diagnosis Mod, CRB 185
    - (38) ×1 Robot Repair Kit, CRB 170
  - Players can then refer to this sheet to add to their rolls with AP or change their results with Luck points as described on pages 196 and 200 of the Core rule book.
  - Alternatively, I already went and created location loot for every location featured on the map here under the “Location Lookup” tab.
- Once they have finished looting they will discover a strange intercom machine in the vault. It appears to be voice activated pre-war tech and seems to be linked to otherwise inaccessible lockboxes in the bank vault.
  - This starts the side quest The Velvet Curtain, and the players should be informed of as much. You can start reading about it on the wiki and inform them of old world posters that seem to be plastered in the waiting room.
- At this point Madam Panada will pretend to collect her things from the vault if not collected for her and an observant or combative player may ask for an opposed test. Opposed tests like haggling or lying for example are detailed in the Core rule book, Haggling is on page 85.
- Madam Panada thanks them for their help and offers them a permanent 5% discount. Madam Panada is a merchant that sells junk, food, and beverages

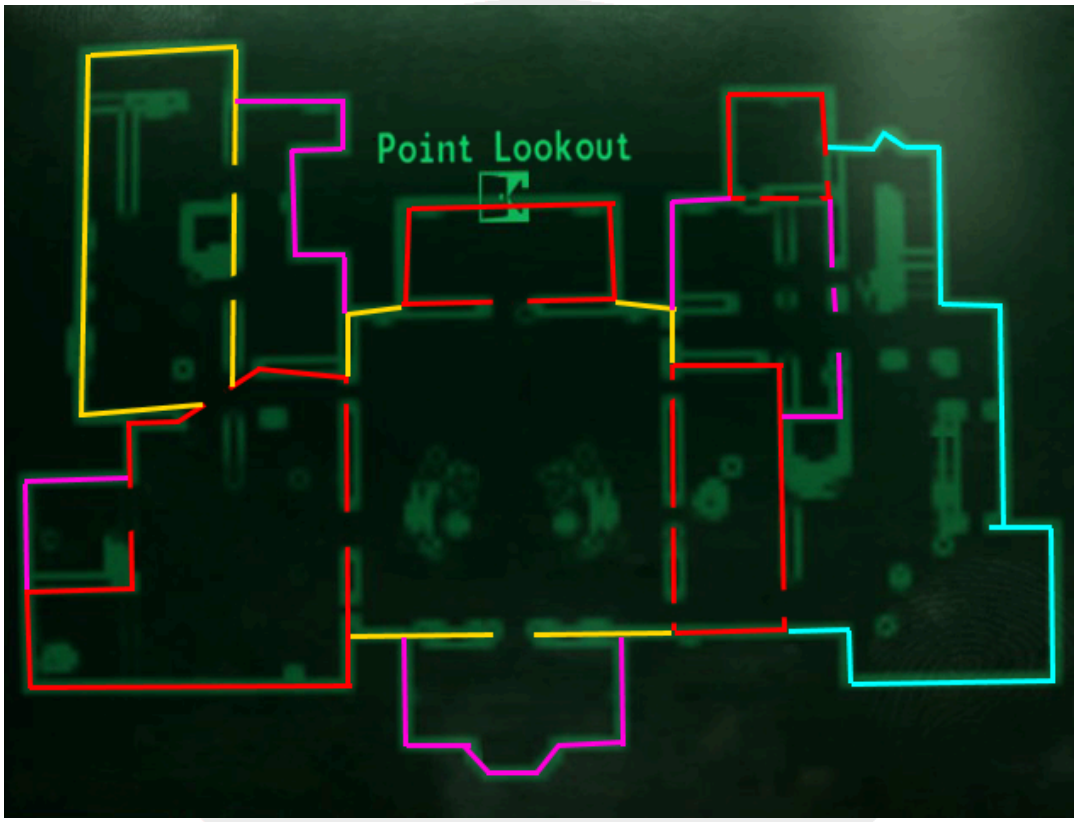

readily, and will mostly carry a small number of weapons, armor, and ammo up to rarity 2 as described in her stat block, this tool might help trading.
    - She will likely mention visiting Haley at Haley's Hardware (**I7**) for upgrading guns, gear and robots.
    - Warns them against trusting that “snake” Tobar at the docks.
    - And will be helpful if she can be so.

- **The Mystic Merchant,** Side Quest, End
    - Reward ⅓ level of XP as this was a side quest or use the rules on page 49 of the Core rule book to give them an amount of XP.
        - Side quests generally do not have additional loot and instead offer small bonuses like a discount or reputation with NPCs.
    - Also remind them that they have a side quest, The Velvet Curtain, refer to the wiki for greater detail.

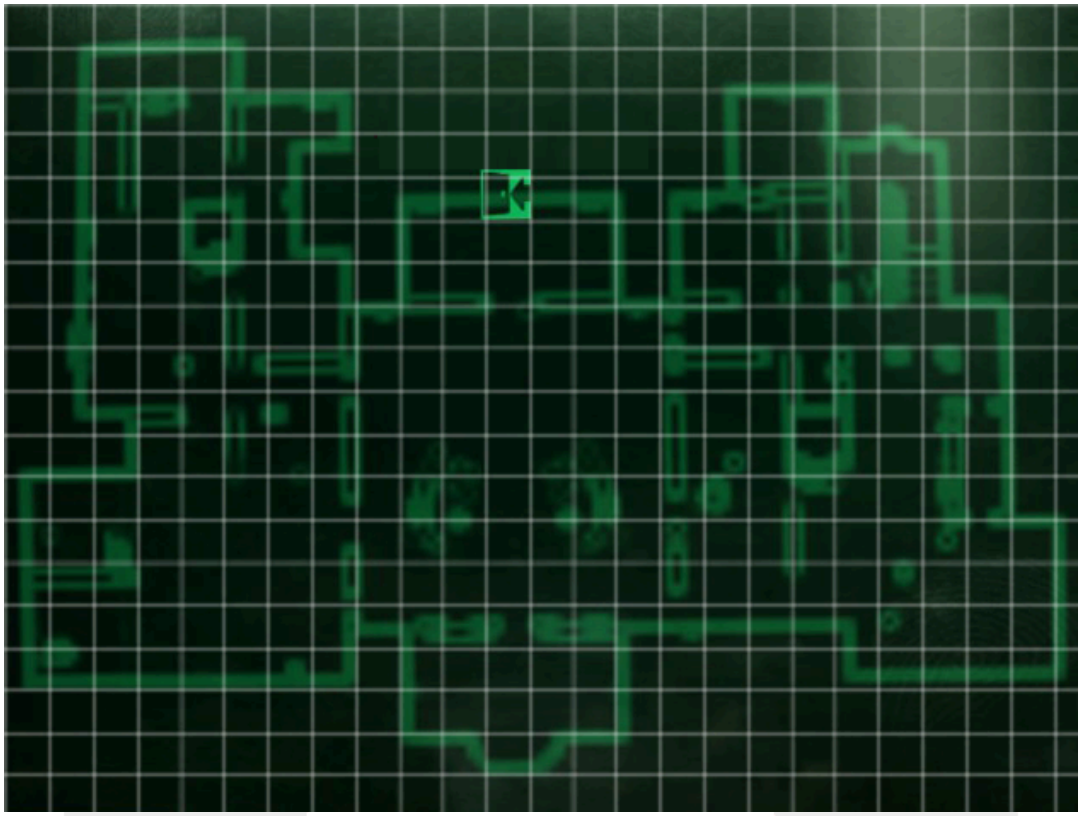

- **The Local Flavor,** Main Quest, Start
    - Investigate the manor on the hill. (**L12**)
        - If your players need to rest along the way, have them use the camping tool I made and get ready for their roles. Try to also keep track of the time, given that the players are tracking their stats in hourly allotments you can hand this off to a player. This is mainly for tracking light levels.
    - Upon entering, a suave ghoul in a business suit and two dogs will be fighting a tribal and multiple others. The same tribals will be hostile to the players.
    - Desmond, as he introduces himself, will invite them to lay land mines, barricade doors and take cover as more tribals are on the way into his home. He also provides them with the following equipment.
        - ×3 Stimpak
        - ×5 Frag Mines

        - A relevant amount of ammo for their equipped weapons. (Refer to the looting table in the core book pg 200 or this table I made.)
    - The encounter that follows should be a Very Hard encounter with raiders that are described by you as tribals.
        - Use this tool, this tool and this tool to help.
    - Divide the map into zones or a rough grid if you are using the homebrew grid system. An interior map example has been provided and like most locations can be found on the wiki page for reference, or just as easily made up by you to fit the encounter.

Calvert Mansion interior Pip-Boy map with added “zones”

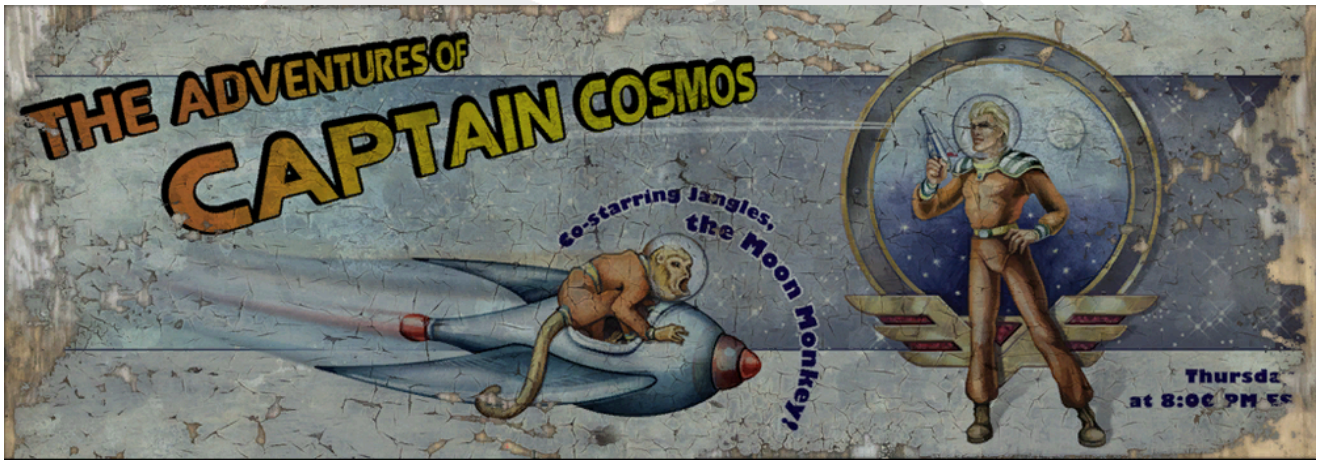

Calvert Mansion interior Pip-Boy map with added “grid”

- If the players or you feel that they are being pushed too hard, have the tribals retreat, but if they are doing too well or are knowingly acting stupid, feel free to send more enemies in to challenge, but not kill them. (Overseers are allowed to lie, but don't do it too often and only when needed.)
  - Ask yourself if the players are struggling because of you, or because of their choices, if it's your fault, fix it, if it's their fault, they get to fix it and you get to help.

- **The Local Flavor,** Main Quest, Complete
  - Once they have finished looting the dead and taken accounting of themselves inform the players that they have completed the first quest.
    - Reward 1 level as this was a major quest or use the rules on page 49 of the Core rule book to give them an amount of XP. (100 xp if still level 1)
    - He also lets them peruse and pick two items from his stash
    - The players can pick any two Rarity 2 items they’d like, this loot table lists all the rarities of the items.
      - Desmond does make a point to keep them away from his nicer equipment, saying “None of the ‘good stuff’ though, you’ll all need to work for that.”
      - Inform your players that they have started the “Walking with Spirits” quest.

- **Walking with Spirits,** Main Quest, Start
    - Desmond should then offer them employment as he seems very put out by the attack, saying "*Those mud-lovers want me dead, and haven't extended the common fucking courtesy of telling me why!"*
    - He then requests that they go to the Church (**M3**) to discover why they are suddenly attacking as they had never done so in the past.
        - Ask your players either after the game or via messages if they could elaborate on their pre-campaign existence. Defining moments, names of their families, things they regret. This will be important as you research this quest specifically.
        - Regarding robot characters, Tobar seems to have a variety of pre war toys, a digital virus and an additional organic installation here or there may be something that would entertain him.You may even mention that Tobar gave them a once over when first boarding for "safety" of course.
        - I'd recommend playing it yourself, watching a playthrough or reading about it to understand why you should do so.

Quests & Story Beyond

At this point you should have all you need to design a campaign for Point Lookout, wherever it may go. The following resources should let you wing just about anything in the area, or help you do it yourself. All you really need to have prepared as previously stated are a knowledge of the quests, a few combat encounters and most importantly what your players want.

Use the **map tool** to determine:

- What enemies and hazards they will face.
- The weather they might deal with
- What loot is in a location

Refer to the **Wiki** for:

- NPC information
- Quest Information
- Detailed location descriptions
- Pictures

Useful Tools

- World Map lookup: Point Lookout
- Advanced Cheat Sheet
- Combat Calculator
- D20 Loot Generator & Tables (consider replacing some food items with Punga Fruit)
- Editable Computer Terminal
- Enemy Look Up
- GM Screens
- Grid Based Gameplay Re-worked (originally by e4g13)
- Legendary Armor Roller
- Legendary Weapon Roller
- Merchant/Trade Calculator
- NPC/Creature Leveler
- Pre-made Combat Encounters
- Settlement Calculator/Manager
- Trap/Weather cheat sheet & homebrew
- Travel Time Calculator

New Enemies & NPC Stat Blocks

Point lookout has a variety of unique individuals and enemies, the following are just some of those and if playing at higher levels consider using this tool to level them up.

Enemy NPCs • Swamp Folk Creeper • Swamp Folk Tracker • Swamp Folk Bruiser • Ruzka The Wonder Bear
NPCs • Calvert • Desmond Lockheart • Haley • Jackson • Madam Panada • Marguerite • Pilk • Tobar The Ferryman
Vehicles • Smuggler Boat • River Boat • Stealth Submarine

Swamp Folk Creeper

Level 5, Mutated Human, Normal Character (38 xp)

S	P	E	C	I	A	L
5	5	7	4	4	9	4

Skills

Big Guns 1 Small Guns ■ 4 Sneak ■ 3	Survival 3 Unarmed 2 (■ Tag Skill)

HP	Initiative	Defense
12	14	2

Carry weight	Melee Bonus	Luck Points
205 lbs.	+0 ▫	-

				Likes to use cover.
2	0	☒	0	

Attacks

- **UNARMED STRIKE**: STR + Unarmed (TN 7), 2 ▫ Physical damage
- **Combat Knife**: STR + Melee Weapons (TN 8), 3 ▫ Physical damage, Piercing 1
- **PIPE BOLT-ACTION RIFLE**: AGI + Small Guns (TN 13), 5+1 ▫ Piercing Physical damage, Range M, Fire Rate 0, Two-Handed, Unreliable

SPECIAL ABILITIES

- **RIFLEMAN PERK:** When you make a ranged attack with any two-handed weapon with a Fire Rate of 2 or lower (except heavy weapons), you add +1 ▫ to the weapon's damage per rank.
- **IMMUNE TO RADIATION**: The Swamp Folk reduces all Radiation damage suffered to 0 and cannot suffer any damage or effects from radiation.
- **Utility Coveralls:** Utility Coveralls increase the wearer's maximum carry weight by +5.

INVENTORY

- Pipe Bolt-Action Rifle
- Board
- Assorted human bones (2 ▫ junk)
- Wealth 1 (1d20 caps)
- Utility Coveralls

Swamp Folk Tracker

Level 7, Mutated Human, Normal Character (52 xp)

Attacks

- **UNARMED STRIKE**: STR + Unarmed (TN 11), 4 ▫ Physical damage
- **BOARD**: STR + Melee Weapons (TN 13), 6 ▫ Physical damage, Two-Handed
- **PIPE REVOLVER**: AGI + Small Guns (TN 9), 4 ▫ Physical damage, Range C, Fire Rate 1, Unreliable

SPECIAL ABILITIES

- **BARBARIAN PERK:** +2 to Physical and Energy damage resistances (included).
- **IMMUNE TO RADIATION**: The Swamp Folk reduces all Radiation damage suffered to 0 and cannot suffer any damage or effects from radiation.
- **Casual Clothing:** Wearing casual clothing allows you to re-roll a single d20 on one STR or AGI based skill test you make each scene, as the clothing is easy to move in.

INVENTORY

- Pipe Revolver
- Board
- Assorted human bones (2 ▫ junk)
- Wealth 1 (1d20 caps)
- ×2 Punga Fruit
- Casual Clothing

Swamp Folk Bruiser

Level 10, Mutated Human, Notable Character (148 xp)

S	P	E	C	I	A	L
10	8	9	4	6	5	5

Skills

Athletics ■ 4	Small Guns 3
Melee Weapons ■ 4	Survival 3

250 lbs.	+2 ▫	3

				Likes to get up close and knock victims down.
5	5	☒	0	

Attacks

- **UNARMED STRIKE**: STR + Unarmed (TN 14), 4 ▫ Physical damage
- **Chainsaw**: STR + Melee Weapons (TN 14), 6 ▫ Physical damage, Vicious, Two-Handed, does not benefit from melee damage bonus.
- **PIPE REVOLVER**: AGI + Small Guns (TN 9), 4 ▫ Physical damage, Range C, Fire Rate 1, Unreliable

SPECIAL ABILITIES

- **BARBARIAN PERK:** +2 to Physical and Energy damage resistances (included).
- **IMMUNE TO RADIATION**: The Swamp Folk reduces all Radiation damage suffered to 0 and cannot suffer any damage or effects from radiation.

INVENTORY

- Pipe Bolt-Action Rifle
- Board
- Assorted human bones (2 ▫ junk)
- Wealth 1 (1d20 caps)
- ×5 Punga Fruit
- Chainsaw
- Tough Cloths

Ruzka The Wonder Bear				Level 14, Mutated Mammal, Legendary (306 xp)
Body		**Mind**		
11		8		
Melee	**Guns**	**Other**		
5	0	4		
HP	**Initiative**	**Defense**		
111	19	1		
				Focuses on anyone that pops their big red ball.
2	1	☒	2	

Attacks

- **CLAWS**: BODY + Melee (TN 14), 9 ▫ Vicious Physical damage
- **BITE**: BODY + Melee (TN 14), 10 ▫ Piercing Physical damage

SPECIAL ABILITIES

- **CRUEL**
  - **Effect**: The creature gains 1 Luck point (even if it normally does not have Luck points) each time it inflicts a critical hit.
  - **Mutation**: When this creature mutates, add the Vicious damage effect to all of its attacks. If any attack already has the Vicious damage effect, instead increase that attack's damage by +2 ▫.
- **BIG**: The creature receives an additional +1 health point per Level, but its Defense decreases by 1, to a minimum of 1. Further, it only suffers a Critical Hit if an attack inflicts 7+ damage (after damage resistance) in a single hit, rather than the normal 5+.
- **AGGRESSIVE**: When entering a scene, immediately generate 1 Action Point. If an ally, then this goes into the group pool. If it is an enemy, it goes into the GM's pool.

INVENTORY

- **BUTCHERY**: Scavengers can butcher a dead yao guai with a successful END + Survival test with a difficulty of 1. This yields 2 ▫ portions of yao guai meat; if an Effect is rolled, it also yields 2 common materials.
- Relentless .50 Cal Machine Gun
  - A Relentless weapon means you'll never need to slow down that rampage! When you inflict a critical hit on an enemy, you may spend 1 Luck point to immediately regain any AP spent on that attack (to buy bonus d20s, to increase damage, etc.

Calvert

Level 10, Robobrain, Major Character (148 xp)

S	P	E	C	I	A	L
5	10	8	10	10	0	6

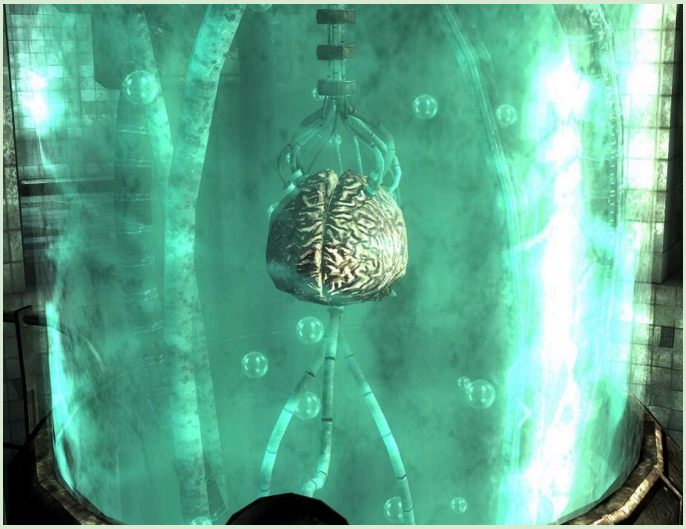

Skills

Energy Weapons ■ 6 Barter ■ 3 Science ■ 6	Speech ■ 6 (■ Tag Skill)

HP	Initiative	Defense
17	15	1

Carry weight	Melee Bonus	Luck Points
230 lbs.	+0 ▫	3

				Likes to use minions.
7	7	☒	☒	

Attacks

- **TURRETS**: PER + Energy Weapons (TN 15), 9 ▫ Piercing Energy damage, Fire Rate 2, Range M

SPECIAL ABILITIES

- **Brain Power**: Calvert surrounds himself with a mix of robots. As a minor action, he may order one of a lower level that is under his sway to perform a major action. Calvert assists that action with INT + Science.
- **FULLY INTEGRATED**: Calvert is fully integrated with the facilities computer system. As such, he has an AGI attribute of 0 but is aware of everything that happens within his domain. Sneak tests made within his facility have an increased difficulty of +3.
- **AMALGAMATION**: The Calvert is a brain in a jar. When rolling random hit locations anything other than a head location counts as a torso hit.
- **IMMOBILE:** Calvert cannot move.

INVENTORY

- **SALVAGE**: Scavengers can salvage from Calvert with a successful INT + Science test with a difficulty of 2. This yields 10+5 ▫ shots worth of fusion cells, +1 ▫ for each AP spent, with each Effect rolled yielding 1 Uncommon material as well.
- **SCAVENGING**: Roll 4d20 caps and 4 ▫ junk items.

Desmond Lockheart

Level 10, Ghoul, Major Character (222 xp)

S	P	E	C	I	A	L
7	9	8	8	7	9	6

Skills

Athletics 1	Sneak 1
Big Guns 1	Speech ■ 5
Explosives ■ 3	Survival ■ 3
Melee Weapons 1	Throwing 1
Repair 2	Unarmed 1
Small Guns ■ 5	(■ Tag Skill)

HP	Initiative	Defense
30	17	2

Carry weight	Melee Bonus	Luck Points
220 lbs.	+0 ▫	6

				Likes to use cover & traps.
3	3	☒	0	

Attacks

- **UNARMED STRIKE**: STR + Unarmed (TN 10), 2 ▫ Physical damage
- **×5 FRAG GRENADE:** PER + Explosives (TN 14), 6 ▫ Physical Damage, Blast, Throwing, Range M
- **HUNTING RIFLE:** AGI + Small Guns (TN 14), 6 ▫ Piercing 1 Physical damage, Range M, Two-Handed

SPECIAL ABILITIES

- **AGGRESSIVE:** The raider boss is quick to action when it senses prey. When the boss enters a scene, immediately generate 1 Action Point. If the boss is an ally, then this goes into the group pool. If they are an enemy, it goes into the GM's pool.
- **ACTION PACKED:** Desmond is driven and motivated and takes matters into his own hands. Desmond begins each scene with a personal pool of 4 Action Points, which he may spend instead of drawing from other sources.
- **Ghoul:** A ghoul is healed by radiation. They regain 1HP for every 3 points of Radiation damage inflicted upon them.
- **Formal Clothing:** Wearing formal clothing allows Desmond to re-roll a single d20 on 1 CHA based skill test you make each scene.
- **LET RIP:** Once per combat, Desmond may 'let rip' with a volley from their .44 Pistol. This adds the weapon's Fire Rate of 1 to the weapon's damage for a single attack (for 7 ▫ total).

INVENTORY

- Hunting Rifle
- ×3 Frag grenades
- Formal Clothes (Ballistic Weave MK II mod)
- Wealth 3 (3d20 caps)
- A letter addressed to "Professor Calvert within the Lighthouse, the letter reads as follows:
  - "It looks as though you have finally gotten the better of me, how unlike you. Well at least I had the foresight to write this in the VERY unlikely event of my untimely death. I digress however, well played and may god have mercy on at least my soul, as wretched as it is. -Dam you to hell, likely your closest friend, - Desmond Lockheart"

Haley

				Likes to use cover.
2	0	0	0	

Attacks

- **UNARMED STRIKE**: STR + Unarmed (TN 5), 2 ▫ Physical damage
- **HOOKED PIPE WRENCH**: STR + Melee Weapons (TN 6), 4 ▫ Physical damage
- **PIPE GUN**: AGI + Small Guns (TN 7), 3 ▫ Physical damage, Fire Rate 2, Close Range, Close Quarters

SPECIAL ABILITIES

- **TINKERING**: When making an INT + Repair test to install a mod to armor, clothing, or weapons, the tinkerer may attempt a mod which would normally require the first rank of a perk, without having the perk itself. The difficulty of the test is increased by 2.
- **HOOKED PIPE WRENCH**: On successful attack, spend 2 AP to disarm the opponent, knocking one held weapon away.
- **LET RIP:** Once per combat, Haley may ‘let rip’ with a volley from their pipe gun. This adds the weapon’s Fire Rate of 1 to the weapon’s damage for a single attack (for 5 ▫ total).
- **Utility Coveralls:** Utility Coveralls increase the wearer’s maximum carry weight by +5.

INVENTORY

- Utility Coveralls
- Welder’s Visor
- Hooked Pipe Wrench
- Bull Barrel Pipe Gun
- Wealth 1 (1d20 caps)
- ×5 Common Material
- ×1 Uncommon Material

Attacks

- **UNARMED STRIKE**: STR + Unarmed (TN 7), 2 ▫ Physical damage
- **10MM AUTO PISTOL**: AGI + Small Guns (TN 8), 3 ▫ Burst Physical damage, Range C, Fire Rate 4, Close Quarters, Inaccurate
- **DOUBLE-BARRELLED SHOTGUN**: AGI + Small Guns (TN 8), 6 ▫ Spread, Vicious Physical damage, Range C, Inaccurate, Two-Handed
- **MOLOTOV COCKTAIL:** PER + Explosives (TN 6), 4 ▫ Persistent Energy damage, Blast, Throwing, Range M.

SPECIAL ABILITIES

- **MASTER TRADER**: When making an opposed test with Barter, Panada generates one automatic success in addition to any they roll.
- **LET RIP:** Once per combat, Panada may 'let rip' with a volley from their 10mm Auto Pistol. This adds the weapon's Fire Rate of 1 to the weapon's damage for a single attack (for 7 ▫ total).
- **SHOPKEEP:** Panada is running a shop, they have 6d20 caps on their person for trade. The GM determines the goods available.

INVENTORY

- Double-Barrel Shotgun
- ×1 Molotov Cocktail
- 10mm Auto Pistol
- Drifter Outfit
- Wealth 6 (6d20 caps)

Madam Panada is a merchant that sells junk, food, and beverages readily, and will mostly carry a small number of weapons, armor, and ammo up to rarity 2.

Players can attempt to make an "Availability Roll"; if successful the players could treat the items available in one or two certain categories as 1 Rarity rating higher than the roll making a few rarity 4 items available. Bear in mind that means better gear can be acquired by players at lower levels if they have the caps to buy them. (Availability roll: roll an amount of ▫ equal to the bartering character's LCK, Fallout: The Roleplaying Game Core Rulebook, p.85)

Smuggler Boat					
Scale	**HP**	**Cover**	**Speed**	**Passengers**	**Impact**
2	**28**	**2**	**2/50 mph**	**5**	**5**

D20 Roll	Location	Physical DR	Energy DR
1-7	Helm	3	2
8-11	Engine	2	1
12-16	Starboard Chassis	4	4
17-20	Port Chassis	4	4

Qualities

Watercraft: The vehicle travels only on water and cannot travel along the ground at all. If this vehicle suffers a Chassis critical hit, it begins to take on water, and will sink after a number of rounds equal to twice the vehicle's Scale. (4 rounds)

Cargo: The vehicle may carry up to 200 lbs of additional cargo.

Exposed: The passenger and crew of an exposed vehicle can be targeted by attacks from outside the vehicle and may attack with their own weapons.

Rugged: Operate tests to repair Rugged vehicles are reduced by difficulty by 1.

Fuel

10 Flamer Fuel per hour, double that in poor weather.

River Boat					
Scale	**HP**	**Cover**	**Speed**	**Passengers**	**Impact**
3	**40**	**3**	**2/40 mph**	**30**	**8**

D20 Roll	Location	Physical DR	Energy DR
1-8	Helm	2	1
9-10	Engine	2	1
12-16	Starboard Chassis	4	4
17-20	Port Chassis	4	4

Qualities

Watercraft: The vehicle travels only on water and cannot travel along the ground at all. If this vehicle suffers a Chassis critical hit, it begins to take on water, and will sink after a number of rounds equal to twice the vehicle's Scale. (6 rounds)

Cargo: The vehicle may carry up to 400 lbs of additional cargo.

Exposed: The passenger and crew of an exposed vehicle can be targeted by attacks from outside the vehicle and may attack with their own weapons.

Cumbersome: The vehicle is bulky and unresponsive and increases the difficulty tests to move by +1.

Fuel

The steam engine burns 10 Common Materials per hour, double that in bad weather.

Stealth Submarine					
Scale	**HP**	**Cover**	**Speed**	**Passengers**	**Impact**
3	**40**	**3** ▫	**2/40 mph**	**8**	**8** ▫

D20 Roll	Location	Physical DR	Energy DR
1-8	Propeller	2	1
9-10	Engine	2	1
12-16	Starboard Chassis	3	3
17-20	Port Chassis	3	3

Qualities

Watercraft: The vehicle travels only on water and cannot travel along the ground at all. If this vehicle suffers a Chassis critical hit, it begins to take on water, and will sink after a number of rounds equal to twice the vehicle's Scale. (6 rounds)

Cargo: The vehicle may carry up to 100 lbs of additional cargo.

Enclosed: The vehicle is completely enclosed, protecting crew and passengers within. Crew and passengers cannot be targeted by attacks from outside the vehicle, but also cannot use their own weaponry. Passengers and crew inside of Enclosed vehicles do not suffer Radiation damage from environmental effects.

Cumbersome: The vehicle is bulky and unresponsive and increases the difficulty tests to move by +1.

Submersible: This vehicle can go completely under water. Noticing this vehicle requires a test of at least 2 when submerged. When submerged it gains 2 ▫ cover from ranged attacks.

Fuel

The nuclear power plant requires 1 Purified Water per hour of travel or 2 when in bad weather. You may ignore bad weather when submerged.
